homework assignment

homework project: Site map and Wireframes

assignment: Use your research data and preliminary sketches to create detailed and presentable page maps and a site map.

- Site map
  - 1 page; recommended software: Power Point
- Wireframes (Page maps)
  - 1 page per sub page (depends upon your site); analog or digital – your choice. sketches are ok. If you choose to create them digitally - recommended software: Power Point.

purpose/objective:

- To organize the structure and layout of your client’s website without the constraints of any design elements.
- To create reference materials for client signoff.
- To experiment with user interface combinations prior to designing in Photoshop.

format: Post a link to either the images (gifs or jpegs) or the power point document off your main class web page before class begins.

reading: None
