:: homework assignment

homework project: 10 second “black square problem” * flash animation

purpose/objective: To solve a time-based design problem using simple geometric shapes in order to communicate a thematic visual message.

assignment: Using only black squares create a 10 second flash animation that conveys one of the following themes: order, increase, bold, congested, tension, or playful. Pick one and animate it using only black squares.

format: 640x480, 30 frames per second
1. flash .swf
2. post this swf on your class web site and provide a link for us to view it off of your main class web page.

reading: None
